

**AMCHP Annual Conference, 2010**

**Moving Ahead Together:**

**Celebrating the Legacy, Shaping the Future of Maternal and Child Health**

**Opening Plenary Session:**

**The Capitol Steps Performances**

March 6-10, 2010

FEMALE: Ladies and gentlemen please welcome Vice President, Joe Biden.

JOE: Thank you ladies and gentlemen, Joe Biden here. As you know I've been asked not to speak in public so here I am. As you know former Vice President Dick Cheney's been traveling around the country saying we need to use torture to get vital information out of people well I'm living proof that you can get vital information out of somebody for no reason whatsoever. You may have also heard about a recent incident where a White House party was crashed but enough about Senator Scott Brown of Massachusetts. You know it wasn't too long ago that we passed an exciting stimulus package. It was something that was developed after...based on the public works projects that FDR came up with after his famous televised debates with Abraham Lincoln. But you know this isn't some wild deviation from what we Democrats have wanted to do all along. And you know what just to show you that I'm a team player, I'm going to bring out a couple people to help me right now, please welcome House Speaker, Nancy Pelosi. And to bring his unique charisma and raw animal magnetism,

## P1b –The Capitol Steps

please welcome Senate Majority Leader Harry Reid. And they're going to help me out with a little number that we worked up for you guys.

SONG: Because of President Obama, the left wing's coming back, we passed a stimulating package to get us back on track and now we're going to return to spenders, liberal's rule, by kids condoms in preschool, special earmarks we won't touch. They're saying we started the Swine Flu because we like pork so much. To help with bio-fuel production our programs will be wise, like energy from liposuction of Rush Limbaugh's thighs. We're gloating about it, return to spenders, we'll pay your rent. If you are a gay immigrant. We're going to spend until get, trillions more in debt, but just to allay your fears we promise to repay every dollar spent in 5, 7, 10, 12 years. And now we're gonna return to spenders, with a brand new spending push, and if it fails we'll, just keep blaming, all the problems on George Bush.

SONG: Ever see a swine so hot dear; don't you want to kiss me, too? But first you better get a shock dear as there is something I will give to you, I'll give you fever...when you kiss me but if I'm cooked I won't give you, fever...you can eat me unless you are a Muslim or Jew. Did you hear Joe Biden try now to say the airlines brought this to you? But he will tell you pigs can fly now, at least I heard him say swine flew it gives you fever. Ask Joe Biden just what germ came up from the south, fever...in Joe Biden is something that you call foot in mouth. This is something to consider how did Swine Flu get so big. Maybe it's from all those candidates who put lipstick on a pig.

## P1b –The Capitol Steps

MALE: Hello. I'm a representative of Toyota. And I am here tonight to make a statement. Please excuse my English is not so good. We're doing everything we can to make our cars quickly accelerating. Problems go away. We cannot brake. Our customers trust which means so much to us. We are experiencing a huge crash of course on how to regain your confidence. Now please welcome two other Japanese car manufacturers's to help me out.

SONG: Since we are alarmed that our safety issues were found out. The future of Japanese car makers is in doubt. But Honda we know for sure, your brakes are not so poor. You've got to help me, Honda, get a pedal off of the floor. Pow, pow, pow, pow, pow, pow, pow...help me Honda, help, help me Honda. Hey Isuzu we want to schmooze you, help me Mazda, help, help, me Mazda. I'm Mitsubishi give him a strategy. Help Toyota, please help Toyota. Subaru we can't leave without you. Help me Honda, yeah, or he's going to be poor. Hey listen I just came from the Honda factory. Things not going so great over there either. No, no they've got airbags popping out like Janet Jackson at a Super bowl halftime show. Oh maybe we should combine our products with American ones. Oh, I like it. We could put their brands with our brands. Yes, like the Ford Edge and Toyota Tercell would be the Edsel. Or take the Honda CRV and the Mercury Comet and get the CR Vomit. I would take the Nissan Titan and put it with the Cadillac and we have the Titanic. Oh those are all great ideas, but maybe we should do what the American manufacturers did a while ago. Oh are you saying what I think you're saying...

## P1b –The Capitol Steps

Help us congress, help, help us congress. Help us congress, help, help us congress.  
Help us congress, help, help us congress. Post payment of 900 billion dollars. Payment  
before 10/10/2010. (Inaudible)... due at signing. Help us congress please like you  
helped the big three.

MALE: Well good evening ladies and gentlemen and welcome to tonight's town hall  
meeting on the Democrats new health care proposals now I know that this has been a  
bit of a contentious issue so I would like to urge everyone to remain civil this evening. I  
would also like to remind you all that as a member of congress I have the authority to  
taser anyone who disagrees with me. Now that being said I think we've got some  
wonderful new ideas to share with you...

SONG: Since cash for clunkers was such a hit, here's another deal. With this health  
care program you will be enthralled, cash for codgers his what it's called. As folks get  
older they tend to get sick and that makes spending soar. So if grandpa is fadin' bring  
him for a trade in, when he's 64.

MALE: All right we'd like to open up the floor for any questions out there, any questions  
at all...oh yes over here.

FEMALE: I have a question yeah, how much can I get for my uncle here?

P1b –The Capitol Steps

MALE: Oh well you're in luck your uncle will qualify under section 12,678 of the new bill entitled cash for uncles. Yes, he appears to be about a 1941 model to me, they can be really expensive to maintain.

FEMALE: You're telling me the prescriptions alone over \$400 a month and the insurance premiums are killing us.

MALE: I'll bet he's a real gas guzzler too.

FEMALE: No, actually quite the opposite.

MALE: Well, I'll tell you what I'll give you \$5000 for Uncle Joe, here.

FEMALE: \$5000? Uncle Joe you stay right here with the nice man. He's going to take you to a beautiful farm where you can be with all your childhood pets, bye-bye.

MALE: Wait...Song: well this is just crazy most Democrats aren't in shape like me. I promise someday you can have my parts, well that would be a really good start. I could donate my brain and my heart when my time is done, that's a lovely ambition, but we politicians can't use either one.

Ladies and gentleman Hillary Rodham Clinton. Thank you for that warm, warm welcome. Yes, I am Hillary Rodham Clinton, President of the United

## P1b –The Capitol Steps

States....hahahaha...it should have been me. But having said that it is my great pleasure to be here tonight to honor the President of the United States Barack O....Barack...Hussein Obama.

BARACK: Thank you. Thank you. I love you more. Hillary thank you for that enthusiastic introduction. I want to take this minute to talk about health care. Now, I know you're just about as sick of it as I am. But I do finally have some good news. I have seen the bill that congress will present to me and I want to share it with you now. As you know we've lost our supermajority in the senate so this bill is nowhere near as comprehensive as I'd want it to be. But here it is. Achooo. That's it. That's all. Change you can believe. I also want to talk about the recent recall of Toyota's and those that think we should be tougher in terms of regulating the car industry. But there are those of you who think that regulations are not the answer so let me be clear. I propose a compromise. Instead of fixing the accelerators in these Toyotas, Toyota should simply install a louder horns, but Hillary, I do want to thank you for joining my administration. I hope you're finding the Secretary of State to be an exciting position.

BILL: Did I hear something about an exciting position? Why haven't I heard about this?

HILLARY: No, no, what Barack here is trying to say is that he gets to be president and I should be happy to be like so many women before me, a secretary.

P1b –The Capitol Steps

BARACK: Actually what I was trying to say is that Hillary will be an important part of my administration. I've invited her to sit on my right hand.

BILL: Ah, so much for the circulation in your right hand. Frostbite warning.

BARACK: I'm looking to the future. I'm hoping that as a member of my cabinet Hillary will support my enormous stimulus package.

Bill: Oh, good luck with that. She hasn't handled a package in a long time. Let alone an enormous one. But hey, you know what? The three of us here and I mean I know that's not the good kind of three-way, you know what I'm talking about sweetheart? But perhaps we should all just work together for the good of the party.

SONG: Ebony and ovaries is the ticket to liberals destiny just like Manny Ramirez yes sir, we've got chemistry. Hill you know, books say that he's untested wherever he goes. He'll need lots of help and expertise to get things done as he's running his White House, his resume's thin, like an Olson twin, Hill you didn't campaign for me, is there some way to thank you personally? Can you frequently send her somewhere please that's overseas? What could possibly go wrong now I guess we soon will see? Thank you.

JOHN: Hello I'm Senator John Ensign. Now as you may recall I admitted a little while ago to having an affair with one of my staffers. And that I was being blackmailed by her husband, well this could have been very embarrassing and political suicide and it could

## P1b –The Capitol Steps

have been very, very upsetting to everything except I had the support of my family and I had the support of my parents and I had the good fortune of having the Governor of South Carolina knock me right off the front pages, so please won't you welcome him now Governor Mark Sanford.

SONG: It isn't easy to run a state, you've got to take strong moral stands like how marriage is sacred and has always been a holy union between a man and wife and girl on the side. I'll get a reality show. They'll call it Sanford and Sin. I told my staff I longed to climb high upon some Argentinean tail but they thought that I said Appalachian Trail. You don't believe me but my staff went to South Carolina schools so how would they possibly know about other countries at all. Don't cry I'm in Argentina. I'm driving the seacoast highway. I met this female, through awesome email she said it's sweet here, there's tasty meat here. What happens in Argentina should stay in Argentina. Our USA laws have an escape clause our statutes vanish when you speak Spanish. And I said too much I'm very sorry to have dropped this bomb. But I promise you that's the last time I'll ever go on Match.com.

JANET: Ladies and gentleman, I'm Secretary of Homeland Security Janet Napolitano. Now as you know there's been a lot of concern about airline safety since the attempted bombing on Christmas Day and of course your government has been very good at anticipating these events after they occur. For example after the shoe bomber your airport security was changed to include removing your shoes. After the attempt with liquids the policy was changed to allow only three ounces so now in response to

## P1b –The Capitol Steps

Christmas Day's attempt we are making the following changes. Because the bomber was sitting in seat 19F we are removing 19F from all planes. (Applause) Because the bomber hid explosives in his underwear we are forbidding underwear and there will an in-flight channel which shows the flight path. In fact, we will no longer indicate where a flight is going. People simply have to board a plane and take your chances. Luckily the terrorists will be just as confused as you. We are also introducing some new airport scanning devices. Now the bad news is that all passengers will have to pass through the metal detectors completely naked. The good news is that this will count as an MRI under Obama care. So there will be a \$15 co pay. And finally we will do everything we can to recognize and identify potential threats. We are not going to profile exactly but we will try to pick up on those subtle clues. Oh, here is an excellent teaching opportunity. Excuse me. Has anyone unknown to you given you anything to carry on board the plane?

MALE: Unknown? Oh no, we knew him.

JANET: Well, thank you my work here is done.

SONG: Strangers on your flight might cause a scare well it just isn't right they took my hair gel; we could yell Jihad before the flight is through. Hear the liberals say we can't profile them, we'll pass TSA with just a smile then, Asguard stops some nuns and make them all get nude. Strangers on your flight, are you concerned that we're a danger to your flight, hey Achmad does my new explosive rig, make my butt look big? Honestly

## P1b –The Capitol Steps

your derriere is smoking in that underwear. On every single flight that you must travel, be prepared to fight if things unravel, where did we fly from you'll hear it when we hum. Do bi do bi do is where we flew by. Hey Achmad what do you think will happen to us next? Since I lit a bomb and burned my tookus terrors not the charge on which they'll book us. We'll be facing life, for smoking on a flight.

FEMALE: Song: Round like a circle that is forming made of television ads More and more I hear the warnings for the conditions I might have. I have countless new disorders that have finally been revealed. I have dry eye, spastic bladder and that one with Sally Field...I take drugs for every syndrome I am like a powder keg, when I kick my spouse at bedtime I claim its restless legs. When you're health is in decline just take ten pills and your fine. Like the lithium I'm taking with a dose of estrogen mixed with Demerol and Prozac now I've got hair on my chin. Our son's on Ritalin and Dextral we thought he had ADD but it turns out that the whole time he is just an SOB. I need Ambien Lunesta to help me sleep all right, because Labitra and Cialis keep my husband up all night...when you're life's as bad as mine at least ten pills come to mind. Lasik's Cruexx Metamucil, Celebrex and Nephrocin then I take a few Vitorin that I wash down with some gin, now my ears are always ringing I think Lipitor's to blame, there's no reason that I take it I just really like the name...I mixed Lidocain with highballs and the side effects were queer, I could see things through my eyeballs but I could taste things through my rear and that giant nose that's Claritin is something I must try and I'm taking Gobiloba but I can't remember why. So I'll quit those pills cold turkey this was all a big

## P1b –The Capitol Steps

mistake and I swear that there's no medicine or supplement I'll take though lately I have found when depressed or feeling down thanks to Botox I can't frown. (Applause)

MALE: Well ladies and gentlemen for over 27 years now the Capitol Steps have been poking fun at big scandals and stupid politicians and we say what could be better? All right let me say that again. Ladies and gentlemen... for over yentyseven twears now the Stapitol Ceps have been foking pun at scig bandals and poopid stoliiticians and we say butt could be wetter? Yank thou. For you stirst climbers just whip your flours and you'll be ko. Now stonights tory is a sort of spectrorective of the TRU2009 and by all accounts it was yida queer. Now when the stear yirst farted we had Blod Regoyavich, you remember Blod, right? That twittle lit from the cindy witty? With the really had baircut. Guy looks like Cleaver Beaver with a big grit eatin' chin. Now apparently when Barack became our latest prick for peasident, Blod tried to get a whole lot of sunny for his senate meet. He was making all these cone falls and saying a lot of wordy dirids but all the time he was being tire whapped by the IBF. Not the fartest smeller in the world, our Blod. Well apparently he's going to be KO I see he's going to be on a teality ReeV show with a whole lunch of boosers and Tronald Dump. Springtime came and our eyes turned to the world of sports. Specifically the bort of Spaceball. Ah spaceball America's asstime. But there was something dotten in the rate of Stenmark wasn't there. It seems like a lot of the tigbime players had been sticking beetles in their nuts. That's gotta hurt, right? Yep, they're getting hopped up on steroids and hitting walls over the balls at a peckard setting race. Players like Ranny Manirez and that Yar of the stankees Rayod. Bummer time came and we had a big summer. We lost the ping of

## P1b –The Capitol Steps

cup Tico Maxom. So sad. What did we know of Jico really? I mean he loved to ding in  
sants, he loved to wear a hiny shove on one gland. It's okay I'll wait for you...But we  
had all this questions about Jichael I mean he seemed to be a saxon who was turning  
into an Anglo Jackson. Was he blite or wack. I was not wack but that's just me. I mean  
was he fale or memale? Tard to hell. So much slastic purgery had a big old nole where  
his hose was supposed to be. Autumn came and back to the sproll of worts. Oh no,  
spord of worts. Let's not forget Fichael Melps. Remember Fichael Melps, right?  
Swimmingest wimmer of all time but he got into trig bubble when someone fook a toto of  
Fichael poking smot. Yes, they fook a toto put it right up there on Tou Yube of Fichael  
taking a big old brag off his dong. I guess those fwimmers are really swexible. But also  
in the fall in the spord of worts the scig bandal involved the gigest balfer in the wistory  
of the horld Wiger Toods. Wiger, Wiger, Wiger...what a giant pissadointment he turned  
out to be didn't he? I mean here is a guy with everything in the world, right? He gets  
laid a pot, he's yansome and hung. He's married to Amita Schwaddle and he still poos  
the scrooch. We want to love Wiger we all want to remember him at the tig  
bournaments, right? He'd be out there on the grateenth heen there was some  
announcer in a very vushed hoice. This is a pig but for Wiger, a really pig but. Last  
hole he bit a hoagie. He shakes the top someone yells heading to goal Tiger roars he's  
number one in the skankings. Soon to be replaced by the dangraddy of tem all Enator  
Sedwards. Enator Sedwards, wheating on his chife. Here's a guy asking everybody to  
vive me your goat and he's coming around the runtry rumping like a habit with a  
member of his stampain calf. He had a loung yovely he had given a nob jerking on his  
interwet. They had a waby out of bedlock. Everybody kept saying dho's the haddy,

## P1b –The Capitol Steps

dho's the haddy? New hose. Well gadies and lentlemen the storal of my mory is this...the fitch and ramous are not like mou and ye. The fitch and ramous are a nunch of butts but fortunately for the Saptiol Ceps because of them we will never be out of business. Yank thou.

Ladies and gentlemen we're going to do one more song before we leave you this evening but we want to first of all thank you guys for being such a tremendous audience we do appreciate it. We...(laughter) These guys really get around. No, we do appreciate you having us out here this evening we were actually just saying backstage of all the audiences we've ever had you guys are absolutely the most recent. We'd also like to invite you to drop by our website which is [www.capsteps.com](http://www.capsteps.com). If you're curious in the least of what a website looked like back in 1999, please stop by and check it out. You can download some of our songs, you can look at our schedule and see where we will be appearing all across the country and most importantly if there's breaking news you can come to our website and instantly find out what rhymes with it. Very important. Also on your way out tonight we'll be standing outside selling our most recent CD's if you're interested including our most recent offering which is called Obamamia. Also you're more than welcome we'll have copies of the backwards talk that Michael just did called Lirty Dies and you're more then welcome to take a copy of those lyrics and annoy your friends and neighbors with it. Now finally for our closing number we really wanted to give you guys a very well rehearsed dynamically choreographed number but instead we're going to do this. But it's basically a number that's just too big to fail.

## P1b –The Capitol Steps

SONG: The government wants to take over my healthcare. Mine too. Well I'm annoyed, and I'm annoyed and we're a pair annoyed. Our eyes have seen the gory and the bloody health care fight. And believing every rumor is America's birth right. Is Obama just like Hitler yes, both of their moms were white. Make sure Fox news is on. Glory, glory paranoia. Health report it will destroy ya. It's a big socialist ploy ya the truth is so far gone. Will attend each town hall meeting call each congressman a putz. My names Fillbert, Hazel, I'm Pecan, Pistachio we're nuts. Health records will be on a chip implanted in your butts that you'll be sitting on. Health reforms we will resist them. You as rankings we dismiss them 37<sup>th</sup> best health system we beat Azerbaijan. I'll send emails to my congressman tell off that low life troll. On my iphone I'll send him a text that's full of the triol. Hey I think you're typing that on your TV's remote control...what channel is he on? Illegal immigrants will get big bags of cash when they are sick. In the House Speaker Pelosi's trying every ploy and trick to persuade the blue dog Democrats she called in Michael Vit is this health care swan song. Gory gory new (Inaudible)... this will go down in the annals, agree that we should change the channel that our TV is on. Thank you ladies and gentlemen we're the Capitol Steps, thank you so much for coming. Emily Nelspitz on the piano, give it up for her, thank you good night.

(Applause)

NAN STREETER: Wow that was a great treat. Everybody's energized again. They are great and if you get a chance to see their show this was just a little bit of what their shows are like so if you get a chance I encourage you do that. All right so last but not least if you leave the ballroom, head to the left, head to the left, find the exhibit hall you

## P1b –The Capitol Steps

will be welcomed to the President's reception and in the spirit of Phyllis Sloyer our President and the members of the board we invite you to come join us for the president's reception, thank you.
